GATE U.S. Appln.
Serial No. 443,300

Page 7,

OK line 5, between "modifies" and "in" insert
--them--;

line 15, change "filed" to --field--;

line 21, change "ø" to --λ, ø--; and

lines 22-25 (the last four lines of the page),

please correct these lines to appear as follows:

$$\phi = \begin{cases} (\arg (LJ_n, LH_n) \dots -\pi < \phi \leq \pi \\ 0 & \dots \text{otherwise} \end{cases}$$

and amplitude

$$\lambda = \sqrt{(LJ_n^2 + LH_n^2)}$$

Page 8,

line 23, between "magnitude" and "multiplied"

insert -- λ --.

Page 9,

line 6, between "output" and "from" insert

-- λ --;

line 15, delete the entire line and substitute
therefor the following --could be calculated as $\sqrt{LH^2 + LJ^2}$.
The output Bd--;

line 22, change "or" to --of-- and after "limits"
(at the end of the line) add --Lij and--; and

1/2 line 23, after "set" (at the end of the line)
add --by--.
